

2001 TTT

10 years jubilee conference was a success.

We had a guest book, where about 80% guests have written appreciative comments (about 45), and the common theme - inspiring, professionally high level and well organized. All the nine speakers came with good presentations, both Irani and Chilean colleagues were back after the condolence trips to their resp. countries of origin and the young woman presented well her meeting with TTT and a touching poem.

The conforencier did a good job and the speakers maintained their time plans. The first speaker, national level Social psychologist Per Schultz started well by congratulating & pointing that TTT had made a place in the society. His presentation about professional competence was highly appreciated. Norwegian sociologist Gwyn's trust between the generations introduced some new thoughts & she quoted my research (from my presentation in Bergen in August 2001). Similarly Dr. Suman from England provoked us all by focus on institutional racism in his gentle manner.

There were presents for the guest speakers, fellow arrangers and well prepared lunch with baked potato, dressing & salad for everybody. A luxurious dinner in Indian restaurant Bombay for 11 persons including some of our board members was the final event on 15th May. On 16th Dr. Suman made a presentation in Copenhagen municipality's Immigrants office- Noor.

We managed to get the 10th anniversary booklets ready just 16 hours before the conference. It was exactly 20 pages including the Frontpage), looked good but there are some language problems in the text!! . So it is everyday again and wondering if & what will be the long term effect of the conference.
